International student enrolments

International student enrolments

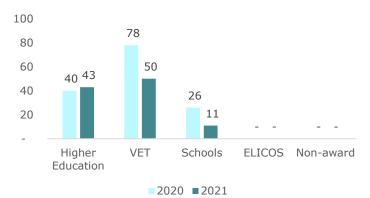

In 2021, student enrolments in the Darling Downs (on student visas) totalled 104. VET remained the largest subsector, with **50** enrolments, followed by the HE and Schools sub-sectors.

-28% decline in enrolments 2020 to 2021

Total international student enrolments in the Darling Downs declined by 28% compared to 2020 levels. Higher Education was the only subsector that recorded positive enrolment growth (+8%), while VET (-36%) and Schools (-58%) declined.

Enrolments by source market

The largest source markets for international student enrolments in Darling Downs were Nepal and Korea, which together accounted for 18% of total enrolments in 2021.

Compared to the other regions in Queensland, Darling Downs as a region attracts a higher share of students from Nepal and Korea.

ill

Two of Darling Downs' top ten source markets recorded growth in IET enrolments in 2021. These were Nepal (15%) and China (17%).

Table 2: Enrolments in top five source markets, 2020 to 2021

	=				
	2020		2021		
Country	Enrolments	Share	Enrolments	Share	Growth (share)
Nepal	13	7%	15	10%	1
Korea	29	15%	13	8%	ŧ
India	11	6%	11	7%	1
Philippines	10	5%	9	6%	1
Papua New Guinea	8	4%	8	5%	1
Total	71	37%	56	36%	I.

The share of total enrolments attributable to the top five source markets, lower than the Queensland total of 56%.

Note: (1) The totals presented in each table may differ slightly from the sum of each of the component parts due to rounding (2) The total number of enrolments by subsector and source market may differ due to differences in the underlying data provided by the Department of Education.

Source market concentration

Overall, the Darling Downs is the most diverse IET sector in Queensland, with a diversity index score of 461 in 2021.* In 2021, the Darling Downs became more diversified, with the concentration index decreasing from 610 in 2020.

This was driven by a decreased concentration of enrolments in Darling Downs' top five source markets, which have decreased to account for 36% of enrolments in 2021, compared to 44% of enrolments in 2020.

The top five source markets accounted for 36% of IET enrolments in Darling Downs, compared to 56% for Queensland.

*Deloitte Access Economics measures the degree of enrolment source market concentration within a region by the Herfindahl-Hirschman index. This is defined as the sum of square of the source market shares of enrolments. The index can range from 0 to 10,000, with a low index suggesting that enrolments in the IET sector are spread over a diverse range of source markets. This can make the sector more resilient to shocks in the global market.

Regional concentration

Geographically, Darling Downs accounted for 0.1% of IET enrolments in Queensland in 2021.

Export revenue

\$4.3m Export revenue in 2021

Total export revenue from international student expenditure on tuition fees and goods and services, and visiting friends and relatives expenditure, was \$4.3 million in 2021.

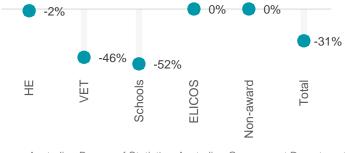

The HE sub-sector made the largest contribution to revenue in Darling Downs, with \$2.3 million revenue for 2021, accounting for 55% of total IET export revenue.

-31% decline in export revenue from 2020 to 2021

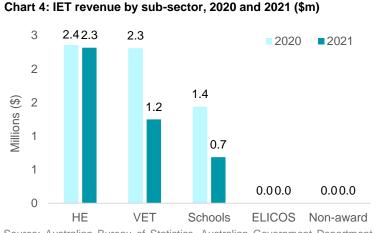

Overall, export revenue declined 31% from 2020 to 2021.

Export revenue declined at a faster rate than enrolments partly due to an increased proportion of student holders being located offshore.

Regional breakdown

Darling Downs was the eleventh largest segment of the Queensland IET sector, attracting **0.1% of export revenue** in 2021. Export revenue declined by **31%** in 2021.

Capacity of CRICOS providers

2% Operating capacity of Darling Downs institutions

In 2021, there were approximately 22 CRICOS education providers in the Darling Downs with a total capacity of 5,151 CRICOS registered places.*

Darling Downs' educational institutions were operating at approximately 2% capacity in 2021.

Darling Downs is operating at a substantially lower operating capacity than the state average of 47%. However, there exists capacity to facilitate further growth in the region.

*Deloitte Access Economics uses CRICOS registered places as a measure of capacity and student enrolments as a measure of demand.

Economic contribution of the IET sector

Direct economic contribution

The IET sector directly contributed **\$11.0 million** to the Darling Downs economy and supported **70 full-time equivalent (FTE)** jobs in 2021 (Table 1).

This represents the value of economic activity associated with businesses that directly supply goods and services to international students and their visitors.

Table 1: Direct economic contribution of the IET sector, 2021

	Value added (\$m)	Employment (FTE)
Onshore students	8.7	67
Offshore students	2.3	3
VFRs	0.0	0
IET sector	11.0	70

Source: Deloitte Access Economics estimates.

Indirect economic contribution

The IET sector also indirectly contributed **\$6.6 million** and **37 jobs (FTE)** to Darling Downs in 2021. This represents the flow-on effects for industries that supply goods and services to the IET sector. This includes the maintenance services supplied to training providers, and the agricultural producers that restaurants source their food from.

Table 2: Indirect economic contribution of the IET sector, 2021

	Value added (\$m)	Employment (FTE)
Onshore students	5.8	34
Offshore students	0.8	3
VFRs	0.0	0
IET sector	6.6	37

Note: (1) The totals presented in each table may differ slightly from the sum of each of the component parts due to rounding (2) The total number of enrolments by subsector and source market may differ due to differences in the underlying data provided by the Department of Education.

Total economic contribution

Value added to the Darling Downs economy by the IET sector in 2021

In total, the IET sector contributed **\$17.6 million** and supported **108 full-time equivalent (FTE)** jobs in the Darling Downs regional economy in 2021. This represents a decline of **23.2%** in total value added contribution, and **27.9%** in employment from 2020.

Table 3: Growth in economic contribution of the IET sector, 2020 to 2021

	2020 to 2021
Value added	-23.2%
Employment (FTE)	-27.9%

Source: Deloitte Access Economics estimates; Australian Bureau of Statistics.

Key industries

The most significant industries supporting the IET sector in Darling Downs are **education and training** (49%), **accommodation services** (21%), and **takeaway and restaurant meals** (8%). Together, they comprised of 78% of Darling Downs export revenue from the IET sector.

Table 4: Direct employment breakdown by IET industry (economic contribution), 2021

Industry	Employment (FTE)
Accommodation	33
Cafes, restaurants and takeaway food services	9
Clubs, pubs, taverns and bars	3
Rail transport	0
Road transport and transport equipment rental	3
Air, water and other transport	0
Travel agency and tour operator services	0
Cultural services	1
Casinos and other gambling services	0
Other sports and recreation services	1
Retail trade	8
Education and training	8
All other industries	4

Frequently Asked Questions

Methodology

Trade and Investment Queensland has worked with Deloitte Access Economics to produce consistent and comparable regional estimates of the contribution of IET to Queensland and its regions. The analysis has been informed by publicly available enrolment and expenditure data from the Commonwealth Department of Education, the Australian Bureau of Statistics (ABS), and Tourism Research Australia (TRA).

The ABS accounts for the impact of COVID-19 on IET export revenue by: (1) capturing the course fee of students studying offshore through 'correspondence courses' rather than 'education-related personal travel', (2) reflecting lower expenditure resultant from any students that have deferred their enrolments, and (3) reflecting any potential changes in students' expenditure on goods and services by using the latest TRA data on student expenditure.

Economic contribution estimates are produced using modelling assumptions consistent with Tourism Research Australia's Regional Tourism Satellite Account (RTSA) model. This model is the most contemporary and sophisticated of its kind in Australia, and been applied in a wide range of contexts to understand the economic contribution of tourism related industries. This is the first year in which this methodology has been available to use in the IET context, and hence represents a substantial methodological change to previous years. To account for this change and enable fair year-on-year comparisons, the 2020 economic contribution estimates in these factsheets have been 'back-cast' by applying the new methodology to the previous year's data. Hence, there are minor differences between the 2020 results presented in these factsheets, and those included in the previous year's factsheets (as noted in the results).

Understanding economic contribution

The economic contribution estimates presented in these factsheets (including both value added and employment) represent the total economic contribution of international students in Queensland to a specific region (e.g. Brisbane or Cairns). This means that in smaller regional markets (e.g. Mackay) a substantial portion of the economic contribution of the sector is driven by students from other regions in Queensland travelling to the area and spending money on goods and services, or local businesses supplying goods and services being consumed by students in other regions.

Using the results

For consistency in reporting, value added and employment (rather than export revenue) are the correct metrics to use in measuring the significance of the IET sector to a region. While it is appropriate to refer to the *total* value added and employment when referring to the overall size or contribution of the IET sector in a particular region, only the *direct* value added and employment figures should be used when comparing the IET sector against other industries within the same region.

Glossary

Contribution	
	The contribution generated by direct transactions between the international student and
Direct contribution	the producer of goods and services. This includes their education fees, as well as living
	expenses.
	The subsequent flow-on effects created by the requirement for inputs from those
Indirect contribution	industries supplying goods and services to IET. For example, this might include the
	fresh produce supplied to supermarkets visited by students.
Total contribution	The sum of the direct and indirect contributions from IET.
Export royonuo	The sales revenue received by the IET sector in providing goods and services to
Export revenue	international students.
	A measure of the sector's return on its capital and labour. It is the indication of the
Value added	sector's value and contribution to the regional economy. Export revenue and value
	added should not be summed.
Visiting friends and	Visitors who specifically indicate in the International Visitor Survey that they are visiting
relatives (VFR)	Queensland for the purpose of visiting an international student.

Disclaimer

These are Deloitte Access Economics' estimates for international student enrolments and contribution based on the best available data. The results do not include the contribution to Queensland from international students studying elsewhere in Australia (e.g. through tourism).
