International education & training snapshot: Gold Coast 2021

Gross Value Added to the Gold Coast economy by the IET sector in 2021

18.4% decline relative to 2020

3,131

Full-Time Equivalent (FTE) supported by the Gold Coast IET sector in 2021

23.2% decline relative to 2020

\$725.7m

Export revenue generated through the Gold Coast IET sector in 2021

21.3% decline relative to 2020

20,925

International student enrolments in 2021

22% decline relative to 2020

International student enrolments

International student enrolments

20,925

enrolments in 2021

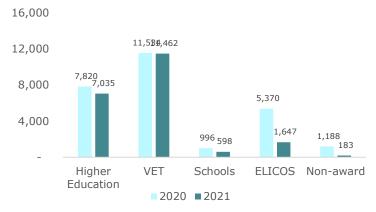

In 2021, student enrolments in the Gold Coast (on student visas) totalled 20,925. VET continued to be the largest subsector, with 11,462 enrolments, followed by Higher Education and ELICOS.

decline in enrolments 2020 to 2021

Total international student enrolments in the Gold Coast declined by 22% compared to 2020 levels. ELICOS and Non-award programs experienced the largest percentage decline of 69% and 85% respectively.

Chart 1: IET enrolments by sub-sector, 2021

Enrolments by source market

The largest source markets for international student enrolments in the Gold Coast were Brazil and India, which together accounted for 30% of total enrolments in 2021.

Compared to the other regions in Queensland, Gold Coast as a region attracts higher share of students from Brazil and Colombia.

One of Gold Coast's top ten source markets recorded growth in IET enrolment share in 2021. This was Colombia, which grew from 5% to 6%.

Table 2: Enrolments in top five source markets, 2020 to 2021

	2020	2020 2021			
Country	Enrolments	Share	Enrolments	Share	Growth
Brazil	4,947	18%	3,443	16%	1
India	2,826	10%	2,806	13%	1
China	3,295	12%	2,546	12%	-
Colombia	1,388	5%	1,219	6%	1
Japan	1,567	6%	1,109	5%	1
Total	14,023	52%	11,123	53%	1

Source: Australian Government Department of Education.

53%

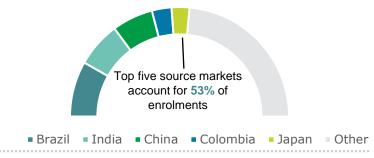

The share of total enrolments attributable to the top five source markets, lower than the Queensland total of 56%.

Source market concentration

Overall, the Gold Coast is the fifth most diverse IET sector in Queensland, with a diversity index score of 748 in 2021*. From 2020 to 2021, the Gold Coast become marginally more diverse, with the concentration index decreasing from 759 in 2020.

Despite this, there was a slight increase in the concentration of enrolments in the Gold Coast's top five source markets, which accounted for 53% of enrolments in 2021 compared to 52% in 2020.

The top five source markets accounted for 53% of IET enrolments in Gold Coast, compared to 56% for Queensland.

*Deloitte Access Economics measures the degree of enrolment source market concentration within a region by the Herfindahl-Hirschman index. This is defined as the sum of square of the source market shares of enrolments. The index can range from 0 to 10,000, with a low index suggesting that enrolments in the IET sector are spread over a diverse range of source markets. This can make the sector more resilient to shocks in the global market.

Regional concentration

Geographically, Gold Coast accounted for 21% of IET enrolments in Queensland in 2021.

Export revenue

Total export revenue from international student expenditure on tuition fees and goods and services, and visiting friends and relatives expenditure, was \$725.7 million in 2021.

The HE sub-sector made the largest contribution to revenue in Gold Coast, with \$379 million revenue for 2021. constituting 52% of total IET export revenue in Gold Coast.

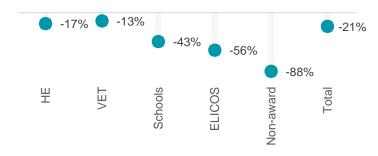

-21.3%

decline in export revenue from 2020 to 2021

Overall, export revenue declined 21.3% from 2020 to 2021.

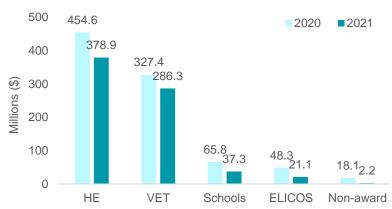

Export revenue declined at a similar rate than enrolments in 2021.

Regional breakdown

Gold Coast remained the second largest segment of the Queensland IET sector, attracting 18.8% of export revenue in 2021. Export revenue declined by 21.3% in 2021.

Capacity of CRICOS providers

In 2021, there were approximately 59 CRICOS education providers in Gold Coast with a total capacity of 11,241 CRICOS registered places.*

Gold Coast's educational institutions were operating at approximately 100% capacity in 2021.

Gold Coast is operating at the highest capacity compared to other regions in the state, and higher than Queensland's operating capacity of 47%. This suggests that there may be limited spare capacity to accommodate enrolment growth.

*Deloitte Access Economics uses CRICOS registered places as a measure of capacity and student enrolments as a measure of demand.

Economic contribution of the IET sector

Direct economic contribution

The IET sector directly contributed \$340.5 million to the Gold Coast economy and supported 1,932 full-time equivalent (FTE) jobs in 2021 (Table 1).

This represents the value of economic activity associated with businesses that directly supply goods and services to international students and their visitors.

Table 1: Direct economic contribution of the IET sector, 2021

	Value added (\$m)	Employment (FTE)
Onshore students	280.1	1,871
Offshore students	59.7	54
VFRs	0.7	7
IET sector	340.5	1,932

Source: Deloitte Access Economics estimates.

Indirect economic contribution

The IET sector also indirectly contributed \$217.7 million and 1,198 jobs (FTE) to Gold Coast in 2021. This represents the flow-on effects for industries that supply goods and services to the IET sector. This includes the maintenance services supplied to training providers, and the agricultural producers that restaurants source their food from.

Table 2: Indirect economic contribution of the IET sector, 2021

	Value added (\$m)	Employment (FTE)
Onshore students	189.3	1,073
Offshore students	27.8	122
VFRs	0.5	3
IET sector	217.7	1,198

Total economic contribution

\$558.1m

Value added to the Gold Coast economy by the IET sector in 2021

In total, the IET sector contributed \$558.1 million and supported 3,131 full-time equivalent (FTE) jobs in the Gold Coast's regional economy in 2021. This represents a decline of 18.4% in total value added contribution, and 23.2% decline in employment from 2020.

Table 3: Growth in economic contribution of the IET sector, 2020 to 2021

	2020 to 2021	
Value added	-18.4%	
Employment (FTE)	-23.2%

Key industries

The most significant industries supporting the Gold Coast IET sector are education and training (44%), accommodation services (24%), and takeaway and restaurant meals (8%). Together, they comprised of 76% of region export revenue from the IET sector.

Table 4: Direct employment breakdown by IET industry (economic contribution), 2021

	, , , , , , , , , , , , , , , , , , , ,
Industry	Employment (FTE)
Accommodation	736
Cafes, restaurants and takeaway food services	306

Frequently Asked Questions

Methodology

Trade and Investment Queensland has worked with Deloitte Access Economics to produce consistent and comparable regional estimates of the contribution of IET to Queensland and its regions. The analysis has been informed by publicly available enrolment and expenditure data from the Commonwealth Department of Education, the Australian Bureau of Statistics (ABS), and Tourism Research Australia (TRA).

The ABS accounts for the impact of COVID-19 on IET export revenue by: (1) capturing the course fee of students studying offshore through 'correspondence courses' rather than 'education-related personal travel', (2) reflecting lower expenditure resultant from any students that have deferred their enrolments, and (3) reflecting any potential changes in students' expenditure on goods and services by using the latest TRA data on student expenditure.

Economic contribution estimates are produced using modelling assumptions consistent with Tourism Research Australia's Regional Tourism Satellite Account (RTSA) model. This model is the most contemporary and sophisticated of its kind in Australia, and been applied in a wide range of contexts to understand the economic contribution of tourism related industries. This is the first year in which this methodology has been available to use in the IET context, and hence represents a substantial methodological change to previous years. To account for this change and enable fair year-on-year comparisons, the 2020 economic contribution estimates in these factsheets have been 'back-cast' by applying the new methodology to the previous year's data. Hence, there are minor differences between the 2020 results presented in these factsheets, and those included in the previous year's factsheets (as noted in the results).

Understanding economic contribution

The economic contribution estimates presented in these factsheets (including both value added and employment) represent the total economic contribution of international students in Queensland to a specific region (e.g. Brisbane or Cairns). This means that in smaller regional markets (e.g. Mackay) a substantial portion of the economic contribution of the sector is driven by students from other regions in Queensland travelling to the area and spending money on goods and services, or local businesses supplying goods and services being consumed by students in other regions.

Using the results

For consistency in reporting, value added and employment (rather than export revenue) are the correct metrics to use in measuring the significance of the IET sector to a region. While it is appropriate to refer to the *total* value added and employment when referring to the overall size or contribution of the IET sector in a particular region, only the *direct* value added and employment figures should be used when comparing the IET sector against other industries within the same region.

Glossary Contribution

Continuation	
	The contribution generated by direct transactions between the international student and
Direct contribution	the producer of goods and services. This includes their education fees, as well as living
	expenses.
	The subsequent flow-on effects created by the requirement for inputs from those
Indirect contribution	industries supplying goods and services to IET. For example, this might include the
	fresh produce supplied to supermarkets visited by students.
Total contribution	The sum of the direct and indirect contributions from IET.
Export revenue	The sales revenue received by the IET sector in providing goods and services to
	international students.
	A measure of the sector's return on its capital and labour. It is the indication of the
Value added	sector's value and contribution to the regional economy. Export revenue and value
	added should not be summed.
Visiting friends and	Visitors who specifically indicate in the International Visitor Survey that they are visiting
relatives (VFR)	Queensland for the purpose of visiting an international student.

Disclaimer

These are Deloitte Access Economics' estimates for international student enrolments and contribution based on the best available data. The results do not include the contribution to Queensland from international students studying elsewhere in Australia (e.g. through tourism).
